Education

ENSEIRB-MATMECA Engineer School
Bordeaux, France (2015-2018)
Télécommunications Engineer Master degree
Specialty Software engineering and networks

Preparatory class for competitive exams
France (2013-2015)

Expertise

Languages & Frameworks :
TypeScript, NextJS, React, Python, Java JEE, Spring Boot, Ionic, Angular, Claude Code

DevOps & Cloud :
Docker, Kubernetes, Helm, GitLabCI, Prometheus, ArgoCD, Grafana, Terraform, Azure Cloud, Linux Systems

Databases :
MongoDB & SQL

Language

French (Native speaker)

English C1 Advanced (Toeic 990/990)

Experience

October 2025 - Now
Freelance Fullsack Developer / Devops

- Design and development of modern web and mobile applications (React / Next.js / React Native), including Supabase integration (database, authentication, ...).
- Project ownership from requirements to deployment and maintenance. Integration of AI tools (Claude Code) to improve development and workflows.
- Technical consulting and product-oriented decision making for clients.

October 2022 - February 2024
Cultura - Bordeaux, France (ATOS Consultant)
DevOps Engineer

- Design and implementation of monitoring tools (Prometheus, Grafana, ...).
- Integration and optimization of CI/CD pipelines using GitLab CI.
- Management of Kubernetes deployments with Helm and optimization of Docker images.
- Built infrastructure as code with Terraform for Azure Cloud environments.
- Cluster administration and supervision to ensure system reliability.

August 2020 - September 2022
SANOFI – Bordeaux, France (ATOS Consultant)
Industrial Mobility Expert

- Managed a fleet of over 4,000 industrial devices across multiple international sites.
- Designed and deployed software and hardware solutions in a global industrial context.
- Led project planning, procurement, design, and deployment phases.
- Collaboration with infrastructure teams (Wi-Fi, LAN, Firewall, AD, Cybersecurity).

February 2018 - August 2020
ATOS - Bordeaux, France
Full Stack Developer

- Creation of a cross-platform mobile app (Ionic) published on Apple & Android stores.
- Built a Dockerized backend integrating real time GPS, transport, and parking data.
- Managed CI/CD pipelines (Docker, Jenkins, SonarQube) ensuring high deployment quality.
- Worked in an Agile Scrum environment within a multidisciplinary team.
- Built and optimized a web-based Smart City management WEB platform with multi-modal transport features.

Hobbies
